

PRE-CUT SOFFIT

American Building Component's pre-cut soffit is roll formed of 29 gauge steel with a "V" groove every six inches, cut to 11 3/4" and 23 3/4" lengths. Panels are also available perforated to allow under-eave ventilation and increased air flow capacity. Recommended for applications under four feet. Additional lead times may apply.

Product Specifications

Profile(s): Solid, Perforated

Lengths: Pre-cut to 11 3/4" and 23 3/4"

Coverage Widths: 12"

Gauge: 29

Coatings: Galvalume Plus®, Signature® 200

Colors: 20 Premium colors

Features and Benefits

Installing soffit to conceal the truss or framing of a roofing system creates a clean look and improves overall building appearance. Unlike traditional soffit panels, which must be cut to size on site, pre-cut soffit achieves this same desired look with reduced contractor labor expenses and increased efficiency.
